

## The Next Evolution in Gangable Rack Solutions

Chief's new Raxxess® G1 Gangable Racks were created to make the installer's job as easy as possible. Hassle-free features include pre-welded ganging nuts and easily accessible hardware, allows for the ability to gangle racks after components are loaded.

### G1 SERIES MODELS

The G1 Series is UL Listed and OSHPD Pre-approved with a weight rating of 2,500 lbs (1,134 kg), and is available in various sizes and depths, including:

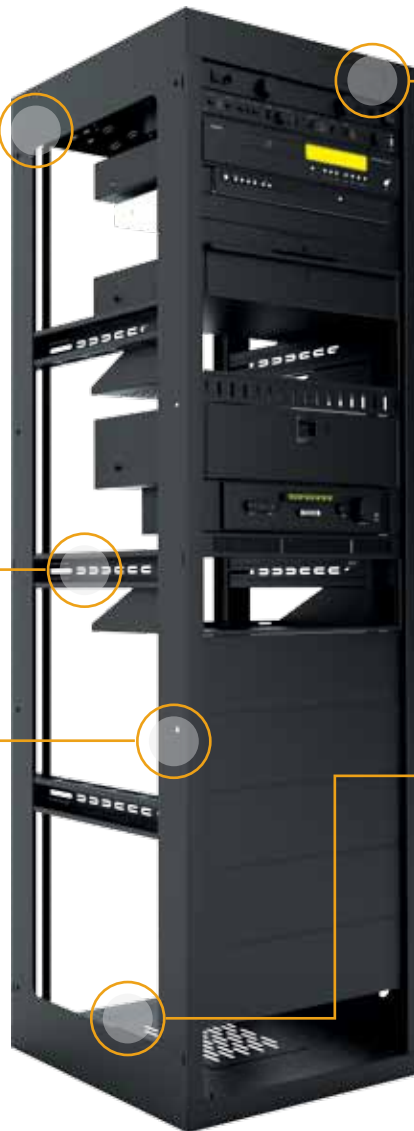

- 28U, 28" (71 cm) deep
- 28U, 33" (84 cm) deep
- 36U, 28" (71 cm) deep
- 36U, 33" (84 cm) deep
- 44U, 28" (71 cm) deep
- 44U, 33" (84 cm) deep

Ganging hardware is included with the rack, and the nut side of the bolt assembly is pre-welded into one side of the rack to simplify ganging

Cable management slots integrated into horizontal rack rail supports for a tidy install

Front and rear rack rails are included and both are adjustable

Brand Panel to customize with your company name

Ganging hardware is accessible in front of rack rails to allow ganging together after components are loaded

Optional doors are reversible, locking, and all doors (solid, perf steel, or Plexiglas) fit either the front or rear of the rack for maximum versatility

Packaging designed to cushion the back of the rack for lay-down loading

Vented, removable bottom cover panel included for extra mounting space
